

Species Survey What species can you find in your quadrat?

The quadrats are 10x10 so there are 100 squares = 100% In each location, for each species that you find, record how many squares include that species.

e.g. if 20 of the squares in your quadrat contained daisies, daisy coverage would be 20%.

	% cover (number of square with this species)				
Location	1	2	3	4	5
Location description e.g grassland, hedgerow, woodland					
↓ Species					
Barnyard Grass	100	97			
Daisy	23	-			
Dandelion	-	8
